BEREA, MADISON COUNTY, KENTUCKY, THURSDAY, MARCH 28, 1901.

Fifty centa a year.

NO. 40.

## IDEAS.

The world fears a spiritual church. Obedience is the key to every door. -McDonald.

I will be lord over myself.—Goetlie. All the good of which humanity is capable, is comprised lu obedieuce. -J. Stnart Mill

From obedience and submission spring all other virtues, as all sin does from self-opinion.-Montaigue.

I was not disobedient unto the heavenly vision .- St. Faul.

#### Take Notice.

Dr. Burgess will preach next Sunday morning on "What killed Christ and who are Ilis Murderers." In the evening there will be a lecture at the Chapel by Prof. Mason on his visit Passion Play, under the auspices of non C. E. society.

held at the Chapel at the vesper hour farm. at 6:30. The history of the closing days of Christ's life will be briefly rior Grain Drill to E. D. Mitchell, this county this week. A new line marks of Prof. Mason, who had been presented. On Friday the services will Monday. be at 3:30 p m. Short addresses at these meetings will be given by flevs. Lodwick, Dodwell, Frost, and Dodge. The services will be worshipful and spiritual. All are invited.

IIIS PUBLIC LIFE AND SERVICES. The foueral and memoral exercises following the death of Dr. Fairchild were such as to impress all with the value and greatness of the life which was ended. President Nichols came Farmers report the outlook for from Kansas to offer a feeling and elequent tribute, and President Taylor of the State Normal in Kansas sent a letter, regretting that he could will begin to extend their lines in not be present in person. The rea pupil as well as a colleague of Dr. Fairchild, were well chosen and affecting; and the final address by Dr. Burgess gave a fitting crown to the occasiou. We publish the outline of Dr. Fairchild's life by Pres. Frost. which was the only written address. FRIENDS, FELLOW STUDENTS, AND NEIOHBORS:

> How can we apeak when the heart is dumb with sorrow? How can we listen to any human voice when God is speaking through his mysteriona work. providence as he apeaks to-day?

Each one of us in this churchhouse has lost a friend. The growing plans of this College are brought Grundy were baptized and received Frost, on a business man's advice to parts of this broad land are beating college students and made practical in sympathy with ours to-day as we stand beside the vacant tenement from which a great spirit has gone up to God.

> In such an event our heavenly Father says to us in no uncertain tone, "Sat thy house in order," "for what is your life? It is even a vapor, that est price. appeareth for a little time, and then vanishes away." Realizing something of the great change that has passed upon our comrade and leader, we are reminded how frail we are. And standing beside the door that has through into the life beyond we see all the things in this life in a new and clearer light.

But with these divine voices of admonition are mingled other voice which tell of encouragement and good cheer. This is a triumphant day in beaven, and angels are telling over, as we are telling over upou earth, the

Among the purest and noblest figures of Roman history is that of the matron Cornelia, known as "the mother of the Grachi." She called her sons her jewels, and lived to see them perform high services for their country. There is something divinely touching about the fame of a mother. She is the type of uuselfishness. She works not for her own glory and does not seek to be known or honored except in her children. The woman who neglects husband and household to perform something that could be done as well or better by a man is widely heralded and made notorious if not famous; but Cornelia, Scipio's daughter, Tiberiua Græcua' wife, represents a class of women who are on fire to serve humanity, but who have Adams St., Toledo, Ohlo, and, mention the Citisen. the rare grace of modesty, and the devotion of self effacement, and are famone, if at all through their children.

America has had some women of the Cornelia pattern and among them The March term of the Berea po- must be counted Nancy Harris, a Pulice court was held Saturday by ritan maiden born in the Berkshire Judge Van Winkie. The following hills of western Massachusetts who

heir own feel, using the hide of deer, bear, culves, and swine.

CONTINUED FROM FIRST PAGE.

I wish you to notice that the Fnirchild family had no advantage over the families of our back mountain counties to-day except two: they had seen the improvements of Massachusetts and knew what could be accomplished by hard work, and they believed more strongly in education.

George was the tenth child in this family, and much younger than all the rest. By the lime he was born his father had burued brick and built tien. Win. It. Waiiace, one of the a comfortable house, and his older brothers were already away at school.

Twice in his childhood his family removed for a time to the college town of Oberlin so that sous and daughters might attend school. Fi-Gregory was hanged at Kennett, Mo., nally three sons and two daughters completed a college course.

By this change from farm to vil lage and back again he became per feetly familiar with all kinds of work, and guined strength for his not specially robust constitution by outdoor exercise.

He was a good learner. As a haby he could spell words with letters upou blocks before he could talk. During his college course he dropped ont to teach school in Michigan, and ed many institutious of learning, and during the latter part of his course look the opportunity to consult the he taught in the lower departments great libraries of the east on malters

On the 25th of November, IS63, his parents celebrated their golden wedding (his father lived to be ninetyseven years old) and on that day The severest blizzard for several their youngest son was married to his class-male, Charlotte Halstead. In her George Fairchild found a wife whose affection, devotion, and wis dom were a life-long joy. They had him. He was in fullest sympathy graduated from college in 1862, and with all that Beren stands for. He Northwestern Christian Advocate, he was then in his Theological course. His mother was receiving her reward. Her son Henry was Principal of the Preparatory Department at Operlin, and soon after came to Beren where he was President for twenty years. Her son James was soon after appointed President of Oberlin, n posetion he held for more than a quarter of a century.

And in 1865, George, the Henjamin of the tribe, was called to the Profess State Agricultural College of Michi gan. This was the lirst great work moted to the rank of brevet unjor tor gallaut action at thilongos, Phil- of his life, and in it he continued for lifteen years. During these years he was more than a teacher -he was in-Mrs. Lentgert's ghost is said to still occupy the land in controversy thrested in all the alfairs of the institution, and became its leading spirit, and for a lime its acting President. lighting going to and coming from Agricultural colleges were a new thing in those days, and Dr. Fairchild as a classically educated man did splendid service in making the newer courses both practical and popular.

His lalent and success were widely recognized, and in 1879 when Kansas College at one of the greatest erises needed a President for its new Agricultural College, he was called to that ident and his wife have done during important post. Others will speak of the last two years toward seenring his work in that institution. He saw the perpetuity of this institution they a body of less thau three hundred students increase to above eight hun- and strong man here as Vice Presidred, and planned the laying out of dent. instruction, the assembling of resources, and the organizing of forces,

which made a trne peoples college. The greatest proof of his devotion to that work, to which eighteen years leaving it. A political revolution ways happy -he carries his heaven in swept over the state, and those who his own heart. His salary was a cultural College. There was no right far from grand. His work not such lng a captured their langer he saw a or precedent by which they could do us to receive at once much of praise giri atout 18 or 19 years old lying dead, this, but they had the power, and set and applause. A Point of View for Idlers.

Cor. 15:3.

Self-seeking and secr-coddling and avoldance of all avoldable palms and duties ought to make na discontented. and they do. Part of our time and strength we have need to devote to iabors whereof the pay comes not in cash, nor in ordinary pleasures or advantages, but in satisfactions which are spiritual and benefit our souls, To have no anxieties, to be subject to no annoyances, to have no unwelcome duties and no occasiou for seif-denial, la not by any meuns to be in a good case. Anyone finding blinself in such a predienment is bound to go out and hunt up tabors and troubles merely to make life worth living. Every one of us is a wheel with cogs in it, mennt to fit in with other cogged wheels and turn more or iess iaboriously and effectively in the great human machine. -Serlbner's.

Madame Grand's Aphocisms.

Mme. Sarah Grand latety consented to taik on the art of happiness. Some of her aphorisms are worth keeping: There are minor pteasures whose effect le accumulative, and which

make ua a happy lifa. Even in choosing to be miserable we are happy, since there is happiness in every act of choice.

There is a great deal of difference between a copy and an imitation. When people begin to be orttical they cease to be plenannt.-Saturday Evening Post

# JOHN BRENT.

#### Maj. Theodore Winthrop's Great Story .-- Horses, Hunting and Adventures in the West.

CHAPTER XX.-Continued. An arroyo, the channel of a dry torrent, followed the pass. It had made its way as water does, not stinightway, but by that potent femlnine method of passing under the frowning front of un obstrele, and leaving the dull rock staring there, while the wild creature it would have behl is glidling away down the valley. This zigzag chonnel baffled us; we must leap it without check wherever It crossed our path. Every second mow was worth a century. Here was the sign of borses, passed but now. We could not choose ground, We must take our leaps on that cruel rock wherever they offered. Poor Pumps!

He had varried his master so nobly! There were so few miles to do! He hol chased so well; be merited to le he at the death.

Brent lifted him at a lenp nerosa the arroyo,

Pour Pumus?

Ills hind feet slipped no the timeabmothed rock. He fell short. He plunged down a dozen feet among the rough bouhlers of the torrentbed. Brent was out of the saddle almost before be struck, raising him.

No, he would never rise again. Both bls forelegs were broken at the knee. He rested there, kneeling on the rocks where he fell.

lirent grouned, The horse screamed harrildy, horribly,-there la no more agonized sound, and the scream went cchoing blgh up the ellffs where the red annlight rested.

It costs a loving master much to butcher bls brave and trusty horse, the balf of his knightly self; but it costs him more to bear him shrick in auch ndsery. Brent drew his pistol to put poor l'umps out of palu. Armstrong sprateg down

caught his buml. "Stop!" he said in his hoarse wbis-

He had herdly spoken since we started. Mr nerves were so strained that this mere ghost of a sound rang through me like a death yell, a grisly ery of merelless and exultant vengeance. I seemed to hear its echoes, rising up and swelling in a theed of thick apronr, until they burst over the summit of the pass and were wasted in the ernnules of the tower-Ing roomtahr tanks above.

"Stop!" whispered Armstrong, "No sheating! They'll hear. The knife!" He held out bls kulfe to my friend. Brent hesitated one heart-beat. Could be stain his band with his fulthful servant's blood?

Pumpe sereamed again. Armstrong suntched the kulfe and drew it across the throat of the crip-

ided horse. Pour Pumps! He sank and died without a monn. Noble martyr in

the old, heroic cause! I eaught the knife from Armto the ground. I cut off my spurs. They had never yet tonehed Fuluno'a flanks. He stord beside me quiet,

but trembling to be off. "Now Brent! up beblad me!" I wblspered,-for the awe of death was

Wierts 118. 1 mounted. Brent sprang up behiml. I ride light for a tall man. Itrent is the slightest body of an athlete I ever saw.

Fuluno stood atendy till we were firm in our sents.

Then he tore down the defile. Here was that vast reserve of power; here the threless spirit; here the hoof striking true as a thunderbolt, where the brave eye saw footing; here that writhing agony of speed; here the great promise fulfilled, the great heart thrilling to mine, the grand hody living to the beating heart. Noble Fulano?

I rode with a snaffle. I left it hanging loose. I dld not cheek or guble him. He saw all. He knew all. All was his doing.

We sat tirm, elinging as we could, as we must. Fulnno dashed along the resonnding path.

Armstrong pressed after-the gaint white horse struggled to combite his leader. Presently we lost them behind the curves of the Alley. No other horse that ever fived could have held with the black in that headlong;

gallop to save. Over the slippery rocks, over the sheeny payment, plonging through the loose stones, staggering over the barrlendes, lenping the arroyo, down, np, on, always on -on went the horse, we clingling us we might.

It seemed one beat of time, it seemed an eternity, when the ring of the houfs I heard Brent whisper in my

"We are there."

The crags thing apart, right and left. I saw a sylvan glade. I saw the gleam of gashing water. Fulnno dashed on, uncontrollable,

They were the-the murderers. Arrived but one momentl The lady still bound to that pack-

mule bramled A. & A. Murker just beginning to musaddle.

Larrap not dismounted, in chase of the other nnimals as they strayed to graze. The men heard the tramp and saw

us as we sprang lato the glade. Both my hands were at the bridle.

Itrent, grasping my waist with one arm, was awkward with his pistol. Murker saw us first. He anatched his six-shooter and fired.

Brent shook with a spasm. Ills pistol arm dropped.

Before the nurderer could cook agoin Palano was apon him! lle was ridden down. He was bent-

en, trampled upon the grass-crushed, abolished. We disentangled curselves from the

Where was the other?

The coward, without Bring a shot, was spurring Armstrong's Flathead horse blindly up the ennon, whence we had Issued.

We turned to Murker.

Fulano was up again, and stood there shoddering. But the man? A haof had batternl in the top of hls skull; blood was gushing from hls month; his rlbs were broken; all his body was a troblen, massacred

He breathed once, as we lifted him. Then a tranquil, chillike look stole over bls face that well-known look of the weary body, thankful that the turbulent soul has gone. Murker was

Pulano, and not we, had been exccutloner. His was the stain of blood.

#### CHAPTER XXI.

LUGGERNEL SPRINGS. "I not shot," gasped lirent, and sank down fabiting.

Which liest, the lady or my friend, stato perhaps for her sake? "Her! see to ho!" he mouned.

I unbound her from the saddle, I could not atter a word for pity. She essayed to speak; but her lips only moved. She rould not change ber look. So many hours hardening herself to repel, she could not sotten yet. even to accept my offices with a suile of gratitude. She was cruelly erninged by her lashings to the rough pack-saddle, indely cushioned with blankets. Itot the horror had not maddened ber; the torture had not broken her; the stread of worse had not slale her. She was still nublenchlog and indimitable. And still she seemed to rule her fate with quiet, steady eyes-gray eyes with violet lights.

I carried her n few steps to the slde of a jubilant formation lifting beneath a rock, and left her there to Nature, kludhest lerch.

Then I took a cup of that brilllant water to my friend, my brother, "I can die now," he said feebly,

There is no death in you. You have won the right to live. Keep n brave heart. Drlob!"

And in that exquisite spot, that face glade of the sparkling fountalus, 1 gave the noble fellow long draughts of swed refreshment. The rescued lady trailed berself neross the grass and knelt beside us. My horse, still heaving with his honorable gallop. drooped his head over the group. A pheture to be remembered!

Who says that knighthood is no more? Who says the days of chivalry ure past?

Breut was roughly, but not dangerously shot along the arm. The builted had ploughed an ugly path slong the numeles of the fore-arm and upper-ario, and was lodged by the shoulder. A bail wound; but no bones broken. If he could but have rest strong. I cut the thong of my girth. and peace and mirgeryl that if not, The heavy California saddle, with its after the fever of our day, after the nmeheers and roll of blankets, fell wearing anguish of our doubtful gallop; If not?-

Ellen Clithroe revived in a moment, when she saw another needed her care. Woman's gentle duty of nurse found her ready for its offices. My blumlering great-will gave place willingly to her fine-fingered skilfulness. She forgot her own weariness, while she was magnetizing away the pangs of the wounded man hy her delicate toneli.

He looked at me and smilled with total content.

"My father?" asked the lady, falutly, as if she ilreaded the answer. "Safe?" said I. "Free from the

Mormons. He is waiting for you with a friend." Her tears began to flow. She was

busy bandaging the wound. All was slient about us, except the pleasant gurgle of the fountains, when we heard a shot up the defile, The sharp sound of a justol shot

came leaping down the narrow

chasm, flying before the pursuit of its own thundering echoes. Those grand old walls of the Alley, facing each other there for the shade and sunshine of long, peaceful ages, gilded by the glow of countless summers, splashed with the gray of untique lichens on their purple fronts, draped form unnumbered Octobers with the searlet wrenths of frost-ripened trallers-those solemn walls standing there in ohl siience, unbroken save by the uproar of winter floods, or by the humming flight of summer winds, or the louder march of tempests crowding on-those silent walls, written close with the repord of God's handiwork in the long cycles of creation, lifted up their indignant volces when the shot within proclaimed to them the undying warfare of man with man, and, roaring after, they hurted that murderous noise forth from their presence. The quick report sprang out from the chasm late the quiet glade, where the lady knelt, busy with offices of mercy, and there It lost Its vengeful tome, amt was blended with the rumble of the mingled givalets of the springs. The thundering erhoes paused within, slowly proclaiming quiet up from erag to erag, until one ofter another they whispered themselves to sileme. No sound remained, save the rumble of the stream, as it flowed away down the opening valley into the haze, violet under gold, of

that warm Detoler smiset, I sprang up when I heard the shot, aml stood on the alert. There were two up the Alley; which, after the shot, was living, and which dead?

Not many moments had passed when

I heard hoofs coming, and Armstrong

rode into view. The gaunt white horse galloped with the long, careless fling I had noticed all day. He STUDY OF VENTILATION OF INTEREST Is the system he will demonstrate at moved machine-like, as If without choice or volttlen of his own, a horse commissioned to carry a Fate. Larrap's stolen borse trotted along by

his old muster. Armstrong glanced at Murker's body lying there, a hattered mass.

"Hoth!" he whispered. "The other was sent right into my hands to be put to death. I knew all the time it would be sent to me to do killing. He was spurring up the Alley ou my own horse. He snapped at me. My pistol did not know how to snap, See here!"

And he showed me, hanging from his middle-horn, that loothliest of all objects a man's eyes ever lighted imon, a fresh scalp. It siekened ore. "Shame!" soid I. "Do you cult your-

self n man, to bring such a thing into a lady's presence ""

"It was rather mean to take the fellow's bair," says Armstrong. "I don't believe Itrother Hill would have did it. Hut I felt orful ugly, when I saw that fat, low-lived devil, and thought of my brother, a big, but-hearted man as never gave a bad word to nobody, and never held on to a dollar or a slug when avry man wanted it more'n him. Come, I'll throw the nasty thing away, If you say so.'

"Help me drag off this corpse, and we'll bury man and scalp together," I sold.

We burled him at the gate of the Alley, under a great calrn of stones. "God forgive them both," sald I, as I thing the last stone, "that they

were brutes, and not men." "Brutes they was, stranger," says Armstrong, "but these things is ordered somelaw, I allow your parlener and you is glad to get that gal out of a Morman camp, of It did cost him a borse and both on you an all day's tremble. Men don't ride so hard, and look so wolfish, as you two non have alid, onless their heart is

"It is, indeed, strange," said I, rather thinking about than addressing my companion, "that this brute force should have achieved for us by outrage what love failed in. Fute seems to have played Brute against Brute, that Love might step between and clulm the victory. The lady is safe; but the lover may have won her life and lost his own.'

"Look here, stranger," says Armstrong, "part of this is yourn." pointing to the money belt, which, with the dead man's knife and pistol he had taken from the corpse, "Halves of this and the other fellow's plander belongs to your party."

I suppose I looked disgusted, yet I linve seen gentle ludies wearing boastfully torooches that their favorite heroes had taken from Christian men dead on the field at lukerninup, and shawls of the loot of Delhi cover many shoulders that would shudder over a dead worm.

"I'm not squlmmuge," sald Armstrong. "It's my own and my brother's money in them belts. I'll count that out, and then, of you won't take your part, I'll pass It over to the gal's father. I allowed from signs ther was, that that thar boss Mormon had about tuk the old man's pile. Most likely those shiners they won last night is some of the very suffering Sizzum got from him. It's right he sbould her 'em back,"

I acknowledged the justlee of this restitution.

"Now," sald Armstrong again, "you wunt to stay by your friend and the gal, so I'll take one of the pack mules and fetch your two saddles along before dark lights down. It was too had to lose that Iran gray; but there's more'n two horses into the blie of that black of yourn. He was the best man of the lot for the goln', the savin', and the killin'. Stranger, I've ben hyln' and sellin' and breedin' kettrypids ever since I was ruised myself; lint I allow I never seed a horse till I seed him lunge off with you two on lils back.'

Armstrong rode up the Alley again. Another man he was since his cominlesion of vengennee had been accomplished. In those lawless wilds, venletta takes the place of justice, becomes instice Indeed. Armstrong, now that his stern duty was done, was again the kimlly, simple fellow unture mode him, the type of a class between pioneer and settler, and a strong, brave, effective class it is. It was the churation in youth to the sturdy habits of this class that made our Washington the manly chief he

I returned to my friends by the Springs.

# (To be continued.)

It is difficult, says the Dublin Express, to persumle any one who has noticed the multitude of frogs in Ireland that they were only introduced there artificially, and as lately as thubeginning of the last century. It was a Dr. fainthers, of faithers, who, la tsp5, turned out a hamiful of spawn Into a ditch mar Trinity college. For some years the frogs appear to have contented themselves with the neighborhood of that university, but by 1821 they were found forty miles away, from which point they spread over the whole Island.

Jules Verne has declined to allow his name to be offered to the French neademy, and while begging that body to accept the "gratinde of an old story-teller," replies: "I have just completed my seventy-third year and do not at such an age aspire to the neademy. Dumas, the younger, asked me twenty-right years ago. I declined and since then fifty-nine wendemleians have died. They may be immortals, but they have not been rendered immortal,"

# STOCK AND STABLE.

TO STOCKMEN.

Necessity of Cleanliness, Fresh Air and Sualight to Procure the Best Results-System to He Used at Pan-American Exposition.

prove to be of more genuine benefit to the foul air from near the floor at the those interested in the proper care of live stock than any previous effort in mitted through a central opening in the this direction. Stable construction is a question that appeals with great to secure good results. The question of expense is a great barrier to the proper building of this necessity. Unlarge means, regardless of what the cost might be. As a result practical farmers were slow to take the matter up, as the lilea of a properly constructed stable became at once associated with great expense.

One object of Mr. F. A. Converse, who has charge of the live stock and dairy products at the Exposition, in building a model stable at the Exposition is to counteract this erroneous impression.

A properly constructed stable is not necessarily an expensive one. Cleanilness, fresh air aml sunlight, with a modulated temperature, may be ob tained in a building of ordinary chean construction if properly arranged.

A light, cheap framework covered with paper which is protected with a sheathing of very common boarding and covered with a good roof makes a very good start. This should stand on ground that is well drained and exposed to the sunlight, but protected from cold winds. The floor should be of cement and earefully designed to facilliate eleanliness in every particular. Double doors, fly screens and dark blinds should be provided and made to fit properly.

A system of ventilation should be provided that will ventilate. Anything will not do By excluding the cold and the light ordinarily we also shut out the fresh air, without which no animal can thrive. Many stockmen are eareful about the quality of the food, though earches about everything else in connection with the stable. In this in one direction while leaving them exposed in many others.

through the lungs, it is also being confumes arising from the fermentation of damp bedding, etc.

To thoroughly understand how to properly ventilate a stable it is neceserned by fixed laws and may be easily understood. Warm air is lighter than cold air. Generally speaking, foul air is heavier than fresh pure air from the outside, even at the same temperature. Starting from this well known princinle, ventilation should be arranged acthe bottom

the fresh atr lu, the other, the King system, draws the foul air out. As Mr. Converse prefers the latter, that

the Uxposition. It consists of an air stack with a hoist, the opening of whileh is turned away from the direction from which the whill is blowing. To this main air pipe are attached feeders from different practs of the stable. These femices have The Pan-American Exposition will sible openings to admit and carry off sides of the stable. Erest nir is ad-

roof. As the druft that is created by the homled stack is sufficient to draw the force to every farmer who is anxious bottom air from the stable, fresh air must go down through the central opening to take its place, and a change of nir is a certainty. To prevent the fortunately some of the early examples Intake from striking the animals too of good stables were built by men of strong a shield is placed under the opening which assists in directing the flow of fresh air along the ceiling. In this manner it mixes with the warm air that naturally rises in the center of the stable, and all is intermingful aml allffused.

With a good stable well ventilated and good feed intelligently feel the winter care of stock should be profitalde as well as pleasant.

Epidemics have no had effects on such stock, and a visit from the board of health has no unpleasant consequences for the owner.

HERDERT SHEARER.

# PROFUSION OF LIGHT.

More Than Three liundred Thousand Lumps at I'nn Arcerican.

It has been said that the Pan-Amer tean Exposition will be a Rainbow City by day and City of Light by night, and if this be true it should prove the most beautiful sight of its kind ever created for the delectation of the human vision.

Mach has been written about the Illuminations of the Exposition, but the public is scarcely aware of the magulficence of the scene which is to be erented by the use of Incandescent lights in such generous profusion about the main court of the Exposition and the buildings immediately surrounding it. When one says that 300,000 of true. Nor does this include all the

these lights are to be used, the figures look large, but they are nevertheless lights that are to be used in the general manner they are protecting their stock || || || || || of the Exposition, for on the Midway several concessions, such as the Thompson Aeric Cycle, Streets Stable air is devitalized by passing of Mexico and some others will use as many as 2,000 lights each. In the taminated by chemical decomposition hulblings and about the border of the of the exerementum as well as the grounds will be are lights, while lucandescent lamps will also be used by many individual exhibitors. Thus the figures 300,000 will be considerably increased. The Humination of the Elecsary to study the circulation of air at trie Tower is going to be not only aschanging temperatures, which is gov- ionishing and novel, but truly artistic.

The automobile has won such favor that the construction of these relieles has become one of the important new tudustries of the world. In any new and prominent field like this the Unitcordingly. Fresh air should be let in at | ed Stetrs, with its wealth of active in the top and the foul air taken out at ventive minis, is expected to take the lead. That this country does lead will By experimenting we find if we be demonstrated by the exhibit made smake a slour in the middle of a voom at the l'an-American Exposition.

### VERSES GRAVE AND GAY.

That Fine Old Senrf,

That Fine Old Seart,
Oh, where's the fine old colored scarf in
boyhood days I knew.
The ample, knitted folds of which concealed the face from view;
That great old scarf that usually was more
than three yards long
And lasted years because it was so durable
and strongs.

and strong; That scarf that was an overcoat when it was rightly placed,

was rightly placed,
That went three linnes around the neck and
twice around the waist,
That crossed the breast in such a way ti
vanquished old Jack Frost.
That was so big and tied so tight it never
could be lost;
That joyous searf of colors bright that

gave appearance gay,
With fringed or else long-tasseted endsoh, where is it to-day?
It may be on the country roads, it may be in the wood;

it is not seen on city streets—that much is understood; And so my sympathy now goes to all the

who cannot well appreciate tts comforts and its joys.

Though there be many substitutes, naught

else can take its place; Naught else, when wintry pleasures charm, will so protect the face And keep the neck and body warm, while

giving freedom, too— I would my children had such scarfs as I in bos hood knew. -Chicago Evening Post.

The "Joity-er." I'm allur kind o' glad to see the "jolly-er" come along; The feller that kin tell a joke or mebbe sing

A song;
The man that puls up lightnin' roda you really didn't need, really didn't need.
Or sells you ground that tsn't wuth the paper in the deed.
He has a way o' shakin' hands an' sayin' "tiow-dy-do!"

That jes' convinces you he thinks the world an' sti o' you. He docsn' keer fur money; he is seeh a generous elf!
An' puriy soon he has you feelin' jea' that way yourself!

But I don't bear him any grudge; I jes' take off my hat.
ite's made this ol' world brighter, an' I'm
'bliged to him fur that.
i listen to his stories (an' at some I'm

taughing yit),
An' try to git off jes' as cheap as reason will permit. Fur it's with a little somethin' to have some one comin' out To make you feel that you'rs the reat thing

without a doubt: A regular steppin' thoroughbred-much swifter than the throng-You feel that you're right in it when the jolly-er comes along.

#### THE WAY OF SUCCESS.

Stury of a Ship's Captain as to flow He Gained a Position of Responsibilliy.

"Will you reach and to-norrow, captain?" asked a passenger on board the Alaska, after a long and searching look through his field glasses. Yes, about the mulic of the afternoon," replied the captain, who was having a merry chatter with his youngest passenger, a winsome little "You are a jolly captain," chserved the passenger. "Why should I not be? I have a good ship-none better salls the seas; a good crew. tion's free air and sanshine in abundance and identy to eat and drink."

"But you are particular what your drink shall be. I observe you never accept an invitation to drink a glass of whie with envoie." "No. 1 draw the line against all strong drinks." "Have you scruples against them?"

"Weil, I sappose so. I know they would have 'ne scruples against me, should I indulge. I suppose I might to-day be only an ordinary sailor hefore the mast, drinking and swearing, were it not for the advice of a good eld sea captain, with whom I sailed when I first took to the sea. I began to ticke my wrong grog with the rest, till one day he called me in his eithin and advised me to give it up. He said: 'If anything in the world will keep you down, grog will. If you wish to be ordered about, kicked ations, and despised by everybody, drink grog, but if you wish to rise,

"LEAVE GROG ALONE."

tf you wish to be a smart, clever, healthy sallor boy, and one that every girl loves to look at anil to know and respect, leave grag alone. If you wish to be trusted by your captain and officers, if you wish to pneumonia. rise in your profession, leave grug I did, and am very glad. Grog is a dangerous thing on shipboard. I know for a fact that most of the accidents at sea are caused by drink. Spirltuous liquars are mare dangerous than gunpowder. Cool heads and steady hands are needed by those who manage a sailboat, a yacht or command a ship."

# "ARSENICAL WALK."

Pecaliar Affiction of Men Who Drink Much Beer Which is Made of Glucose.

Newest of all galts is the "arsenical walk," which may be acquired, says George A. De Lesing, a chemist, by the drinking of beer made from glucose Dr. De Lesing is a member of the Society of Chemical Industry, New York eity, at a meeting of which, a few days ago, Prof. Langmuir announced that he had found traces of arsenle in American beers. There was an indignant protest from the chemists interested in the manufacture of glacose and of the "simple elixir of malt and hops."

De Lesing says that during his residence lu London last year he observed the strange, halting gait of the English beer drinkers, and he has also seen it in New York city breweries, where the employes are permitted to have as much heer as they wish to drink. The chemist has not made a lest of Amerlcan beers, as Prof. Languair says he has done, but he thinks it likely that many of the cheaper kinds contain enough arsenic to be deleterious to

"The arsenic accumulates in , the system," said Dr. De Lesing the other day, "and the victim suffers from neuritis. The skla of the soles of the feet becomes hard and scales. The muscles of the lower limbs become hardened and as a result cause that pecollar guit which has become common with Englishmen who drink beer in large quantities."-Chicago Record

## THE SCHOOL.

Edited by J. W. Dinsmore, Dean of the N neal Department, Berea College What it Menus to be a Teache

An Essay for closing Exhibition of Winter Term, by Miss Karicenter M. Buthus. What does it mean to be a teacher Let us ask some teacher who migh know. We will visit her school-room

her workshop, We are pleased to note that the eacher has made un effort to beautify the room. There are good pictures on the walls, there are attempts at pretty furnishings. She herself is neat and pleasing in appearance. She evidently recognizes the fact that as much of the child's time is spent in the school room, that part of his life should be surrounded with pleasand, attractive objects.

But the most important feature in the school-room is the group of children gathered around this teacher.

"She is talling them a story of wonderful adventure, in which the hero is described as preforming a deed of self sacrifice. To her questious at the close of the story, "Johnny, do you think our hero dict right? Would you have done so?" the little mau, looking at her with bright eyes, reidles, "Yes. You told us it is right to give sulting and smoking were presented ter. To start with thoroughbreat up what we want very much to some

Surely here is the teacher to answer

cur question. When there is an opportunity we ask her, "Does tracking mean to you the mere getting of money?" She replies, "I must have wages for my iaisors I am earning my own living, but I want to be a true teacher for I love my work." Again, "Do you mean that you wish to be able to so teach that your papils will be possessed of a certain amount of knowledge?" To which she says, "I want them to know a great deal and to be able to think for themselves. But most of all I want them to learn to love the right.

I want to be a true teacher." The expression, "a true teacher" attracts our attention. It sounds suggestive, it is full of meaning. It means more to us because there are those who have not considered it as did this teacher with whom we conversed.

We all remember some ceacher of our acquaintance who seemed ito us to care very little about us and our them up and smoke with hickory les, and as a preventive of imigestion. Her greatest concern seemed to be to obtain from us as much work as possible. Did we commit some offerce, her wrath could not be appeared. Our school-life was a lurden, and our instruc or a thorn in the flesh. We are thankful that many such as coal can thus be unde as wanted, these do not enter the ranks, but ier it will be to make charcoal and the ferent ones, who teach for the purpose

> something more to their choice. Now, what is the difference between

he true teacher and these others? What teacher do you maw think of who, loving you, brought out the best that was within you? She tried not only to develop your mental faculties, but to arouse within you a desire to be more than a collector of knowledge. She implanted within you, by her own zeal and earnest endeaver, an upward tendency, toward higher and better standard than you had ever before thought of. She skowed you how to study, and how to control yourself. She taught you that the most important thing for you to learn was to do the right in the face of all odds, and to "study to show yourself approved unto God, a workman that

needeth not to be ashamed." Then what does it mean to you to ise a tencher? Does it not mean that in your school of, perhaps, forty little people you have forty individuals each with an infinite soul, placed in your care to do with as you will?

The true teacher will decide on three points: (1) What is this shild pupil as he presents himself to me! Founded (2) What do I desire him to be! Into what do I wish to mold hun? and (8) What method must be employed in order that these aims and ideas may be realized ? The true teacher will work ont

these queries from the inboru conviction that such work is worth while, That must some first and just as sure: ly as the stars and planets re: main in their places with the unaway-ing lixety of God's purpose, so the true, unfaltering character of the Academy Course-Four years, fitting for College, for Imsiness, and sincere earnest teacher will lead and [for life. establish the unformed character of his pupils.

A teacher is a pilot to a child, There are dangerous ways through which the child will have to pass, they are beset with rocks of temptation, and are often narrow and stonev. The vigilant idlot will steer clear of the breakers, will look for the lights ahead, and will try to guide sufely the young voyager to that goal which is the development of the mind, soul, and body.
